## PROFESSIONAL SUMMARY

Motivated Software Engineering student with hands-on experience in full-stack development, mobile applications, networking, Linux, and enterprise software systems. Passionate about building scalable products and startups, with practical experience using Flutter, Spring Boot, Angular, Firebase, MySQL, and Symfony. Strong interest in software architecture, ERP systems, artificial intelligence, and entrepreneurship.

## EDUCATION

|                                                                                                                                                                                                                                                                                                                                                                                                                        |             |

| <b>Mobile developer</b><br>Softsquare IT<br>During my experience at Softsquare, I worked as a Mobile Developer, contributing to the design and development of mobile applications. I was responsible for implementing user interfaces, integrating application features, and improving the overall user experience.<br><br>This experience allowed me to strengthen my mobile development skills, understand the software development lifecycle, and work with modern mobile technologies and best practices.<br>flutter • symfony • mysql                                                                                                                                                                                                                                                                                                                         | 2025-07-01 –<br>2025-08-15 |
| <b>full-stack developer</b><br>freelances.tn<br>As a Freelance Software Developer at freelances.tn, I worked with few clients (not much to be honest) to design and develop custom web and mobile applications tailored to their business needs. My responsibilities included gathering requirements, implementing scalable solutions, integrating REST APIs, debugging and maintaining applications, and ensuring high-quality user experiences.<br><br>Throughout my freelance work, I used technologies such as Java, Spring Boot, Flutter, Angular, and MySQL to build reliable and efficient applications. I collaborated directly with clients, managed project timelines, and delivered solutions that met both technical and business requirements while continuously improving my problem-solving and communication skills.<br>spring • flutter • angular | 2025-01-15 – until<br>now  |
| <b>full-stack developer</b><br>iway-tn<br>During my internship at iWay, I worked as a software development intern, where I contributed to the design and development of software solutions using Java and Spring technologies. This experience allowed me to strengthen my backend development skills, understand professional software engineering practices, and gain hands-on experience in building maintainable and scalable applications.<br>spring • angular • mySql                                                                                                                                                                                                                                                                                                                                                                                        | 2024-02-01 –<br>2024-05-15 |

## TECHNICAL SKILLS

**Languages & Frameworks:** flutter, symfony, mySql, angular, ionic, electron, spring, java, swing

**Tools & Platforms:** socket, MySql, cloud, postgresql, firebase, .net, sqlite, django
